

MEDICAL WIRE & TUBE COMPONENTS

Point Technologies offers a wide range of precision micromachining and forming services. We specialize in custom manufacturing and would gladly consider any projects that you might have. Point Technologies manages everything from R&D to large scale production, and provides some of the shortest lead times in the industry.

SERVICES OFFERED:

- Slits – widths as small as .0012" (30 µm)
- Slots
- Notching
- Holes – diameters as small as 0.004" (100 µm)
- Forming
- Swiss-Turning
- Coining
- Angle cuts (bevels)
- Deburring

SMALL DIAMETER WIRE

- Wire diameters from 0.0005-0.250" (12 µm-6.3mm)
- Lengths from 0.050" (1.25mm) and longer
- Straightness: 0.001" (25µm) per 4" (100mm)
- Wire shapes: round, half-round, triangular, square, rectangular, custom shapes
- Metals: Tungsten, SS, NiTi, Super Alloys, MP35N and all other wire metals and alloys

SMALL DIAMETER TUBE

- Tubing from 36 Ga (0.004" OD x .0015" ID) (.1mm OD x .038mm ID) and larger
- Metals include SS, NiTi, Super Alloys, Noble Metals and many more

ADDITIONAL CAPABILITIES

- Specifications: ISO, ASTM, Mil-spec, IPC, customer requirements

GREAT CUSTOMER SERVICE

- Quick turnaround on quotes
- Short leadtimes
- Friendly service and attention to your needs

MANUFACTURING LOCATIONS

- Colorado
- Illinois
- Costa Rica
